## Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at [www.statcan.ca](http://www.statcan.ca), and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail [infostats@statcan.ca](mailto:infostats@statcan.ca)
- by mail Statistics Canada  
Finance Division  
R.H. Coats Bldg., 6th Floor  
120 Parkdale Avenue  
Ottawa, ON K1A 0T6
- And, in person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on [www.statcan.ca](http://www.statcan.ca) under About Statistics Canada > Providing services to Canadians.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

- ® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**Release Dates (on CANSIM and in The Daily) for the Industrial Product Price Index and the Raw Materials Price Index – 2005****Reference month****Release on CANSIM and in the Daily**

<b>Explanation of Methods Used and Additional Sources for Industrial Price Indexes</b>	<b>61</b>

## Highlights

Monthly prices for manufactured goods at the factory gate were down in July, following two months of slight declines. On the other hand, raw materials prices rose in July as crude oil prices increased for a second month.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.4% from June to July. Lower prices for primary metal products, motor vehicles, chemical products, lumber and other wood products, pulp and paper products as well as electrical and communication products were partially offset by higher prices for petroleum products.

On a 12-month basis, the IPPI decreased 0.3%, down from June's slight increase of 0.1%. The year-over-year change has been decelerating ever since it reached a high of 7.0% in June 2004.

The Raw Materials Price Index (RMPI) was up 1.2% from June to July, following a 5.1% increase registered the previous month. There were price increases in mineral fuels, ferrous materials as well as animal and animal products.

Compared to July of last year, raw materials cost factories 13.7% more, a similar increase to the 12-month change of 13.6% registered for June.

In July, the IPPI (1997=100) stood at 110.8, down from its revised level of 111.3 in June. The RMPI (1997=100) reached 146.8, up from a revised level of 145.0 in June.

### IPPI: Lower prices for primary metals and motor vehicles

On a month-over-month basis, manufacturers' prices were down 0.4% following decreases of 0.1% in May and June.

Primary metal products fell 3.7% as lower prices were observed for steel and nickel products. Prices for motor vehicles and other transport equipment (-1.0%) and electrical and communication products (-0.5%) both decreased, mainly because of a stronger Canadian dollar.

Lumber and other wood products were down 1.4% as a result of a slight increase in supply. Price decreases were also registered for chemical products, pulp and paper products, metal fabricated products, rubber, leather and plastic fabricated products and machinery and equipment.

However, petroleum and coal products prices increased 4.1% compared to June as gasoline and fuel oil prices rose 4.4%. If petroleum and coal product prices had been excluded, the IPPI would have fallen 0.9%, rather than decreasing 0.4%.

### IPPI: Motor vehicles and lumber products are the major factors in the 12-month change

On a 12-month basis, the IPPI was down 0.3% in July. Motor vehicles and other transport equipment were down 5.3% from a year ago, as the result of a stronger Canadian dollar.

## Prices for manufactured goods decrease

Lumber and other wood products declined 11.7% from July 2004 to July 2005, as year-over-year price decreases were recorded for softwood lumber (-17.6%), softwood plywood, excluding Douglas fir (-33.8%) and particleboard (-14.2%).

There were also 12-month price declines for meat, fish and dairy products (-5.7%), primary metal products (-3.7%), pulp and paper products (-3.6%), fruit, vegetable and feed products (-2.5%), and electrical and communication products (-1.7%).

However, prices for petroleum and coal products rose 24.4% from July 2004, up from June's increase of 20.0%. If petroleum and coal product prices had been excluded, the IPPI would have fallen 2.3%, rather than decreasing 0.3% from a year ago.

Chemical products increased 3.1%, due to higher prices for organic industrial chemicals. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, metal fabricated products, non-metallic mineral products as well as machinery and equipment.

### RMPI: Crude oil prices push up the cost of raw materials

On a monthly basis, raw materials prices rose 1.2% in July. Mineral fuels were up 3.1% compared to June, as continuing concerns about supply disruptions caused crude oil prices to increase 3.6%.

Ferrous materials increased 1.9% from the previous month as iron and steel scrap prices were up 4.9%. Prices for animal and animal products rose 0.4% compared to the previous month. Cattle for slaughter prices were up 6.1% in July, due to the re-opening of the U.S. border and increased demand.

However, prices for non-ferrous metals were down 3.0%, mainly due to lower prices for lead, zinc and nickel concentrates. Prices for wood products also decreased 1.7% with lower prices for softwood logs and bolts and softwood pulpwood being reported.

On a 12-month basis, the price of raw materials rose 13.7% in July, similar to the 13.6% year-over-year increase observed in June. Mineral fuels were up 30.9% with crude oil prices rising 38.2%. If mineral fuels had been excluded, the RMPI would have decreased 1.6% instead of rising 13.7%.

Prices for non-ferrous metals rose 7.8%, mainly because of higher prices for radio-active concentrates, zinc concentrates and copper concentrates. Higher prices were also observed for animal and animal products and non-metallic mineral products.

The 12.3% decline in softwood logs and bolts prices pushed wood products prices down 10.4%, compared to the previous year. Vegetable products also decreased 8.8% from July 2004 as prices were down for corn, wheat, barley, soybeans and canola.

### Raw materials prices increase again

### Impact of the exchange rate

Between June and July, the value of the Canadian dollar rose 1.4% against the US dollar. If the impact of the exchange rate had been excluded, the IPPI would consequently have remained unchanged instead of declining 0.4%.

On a 12-month basis, the value of the Canadian dollar increased 8.1% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 1.8% between July 2004 and July 2005, instead of edging down 0.3%.

### Prices for intermediate goods decrease

Prices for intermediate goods fell 0.6% from June. Lower prices for primary metal products, chemical products, pulp and paper products, lumber products, motor vehicles, and electrical and communication products were the major contributors to the decrease.

Higher prices for petroleum products, fruit, vegetable and feed products as well as tobacco products partially offset the monthly decline.

Producers of intermediate goods received 0.1 % more for their goods in July 2005 than in July 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, metal fabricated products, non-metallic mineral products, and machinery and equipment.

These increases were partly offset by declining prices for lumber products, pulp and paper products, primary metals, meat, fish and dairy products, motor vehicles, fruit, vegetable and feed products, and electrical and communication products.

### Finished goods prices decline

On a monthly basis, prices for finished goods were down 0.1% from June. Lower prices for motor vehicles, electrical and communication products, lumber products, machinery and equipment, and rubber, leather and plastic fabricated products were offset by higher prices for petroleum and chemical products.

Compared with July 2004, prices for finished goods were down by 0.7%. Lower prices for motor vehicles, meat, fish and dairy products, electrical and communication products, and lumber products were the principal factors behind the annual decline.

Higher prices for petroleum products, tobacco products, furniture and fixtures, fruit, vegetable and feed products, machinery and equipment, chemical products, and rubber, leather and plastic fabricated products partly offset the annual decrease.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its U.S. counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.  
 The numeric descriptor is of the order ss-mm-nn-pppp-rr where  
 ss indicates the S-level commodity code (from 9 to 28)  
 mm indicates the M-level commodity code (from 14 to 43, 45 to 69)  
 nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details  
 pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)  
 rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- <sup>P</sup> preliminary
- <sup>r</sup> revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- <sup>E</sup> use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

<b>Explanation of Methods Used and Additional Sources for Industrial Price Indexes</b>	<b>61</b>

## Highlights

Prices for manufactured goods at the factory gate were up in August, following three months of declines. Raw materials prices were up again in August as crude oil prices increased for a third straight month.

### Prices for manufactured goods increase

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.3% from July to August. Higher prices for petroleum products, meat, fish and dairy products, primary metal products and chemical products were the major contributors to this monthly increase.

The 12-month change in the IPPI was a decline of 0.4%, similar to July's decrease of 0.3%. This was the third time in four months where prices were down from one year ago.

The Raw Materials Price Index (RMPI) was up 4.4% in August, following a 1.2% increase in July. There were price increases in mineral fuels, non-ferrous metals as well as ferrous materials.

Compared to August of last year, raw materials cost factories 14.5% more, up from the 12-month change of 13.6% in July.

The IPPI (1997=100) stood at 111.1 in August, up from July's level of 110.8. The RMPI (1997=100) reached 153.1, up from a revised level of 146.6 in July.

### IPPI: Prices for petroleum products continue to rise

On a month-over-month basis, manufacturers' prices were up 0.3% following three months of declines.

Petroleum and coal products prices increased 6.5% compared to July as gasoline and fuel oil prices rose 7.8%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.3% rather than increasing 0.3%.

Prices for meat, fish and dairy products were up 1.4% as a result of higher prices for fresh or frozen pork. Primary metal products rose 1.0% as higher costs of raw materials increased prices for copper and nickel products. Chemical products also edged up 0.2%.

However, prices fell for motor vehicles and other transport equipment (-0.9%) and electrical and communication products (-0.5%), mainly due to the continuing strength of the Canadian dollar.

Lumber and other wood products were down 2.4% due to high levels of supply for softwood lumber and lower demand for particleboard. Price decreases were also registered for fruit, vegetable and feed products, pulp and paper products and machinery and equipment.

### IPPI: Motor vehicles and lumber products are the major factors in the 12-month change

On a 12-month basis, the IPPI was down 0.4% in August. Motor vehicles and other transport equipment were down 5.6% from a year ago, the consequence of a stronger Canadian dollar.

Lumber and other wood products declined 17.8% from August 2004 to August 2005, as year-over-year price decreases were recorded for softwood lumber (-24.9%), softwood plywood excluding Douglas fir (-41.3%) and particleboard (-33.5%).

There were also 12-month price declines for pulp and paper products (-3.9%), primary metal products (-3.3%), meat, fish and dairy products (-4.2%), fruit, vegetable and feed products (-1.7%), and electrical and communication products (-1.9%).

However, prices for petroleum and coal products rose 27.7% from August 2004, up from July's increase of 24.8%. If petroleum and coal product prices had been excluded, the IPPI would have fallen 2.8% rather than decreasing 0.4% from a year ago.

Chemical products increased 2.9% due to higher prices for industrial chemicals. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, non-metallic mineral products, tobacco products as well as furniture and fixtures.

### RMPI: Crude oil prices continue to push up the cost of raw materials

On a monthly basis, raw materials prices rose 4.4% in August. Mineral fuels were up 7.9% compared to July, as crude oil prices increased 9.3% due to continuing concerns about supply.

Prices for non-ferrous metals rose 4.6%, mainly due to higher prices for zinc, copper and lead concentrates. Ferrous materials increased 3.5% from July as iron and steel scrap prices were up 7.6%.

## Raw materials prices continue to increase

However, prices for vegetable products were down 4.1% due to lower prices for soybeans, canola, wheat and corn. Prices for animal and animal products fell 1.1% compared to July, as declines were observed for whole fluid unprocessed milk, hogs for slaughter and fish. Prices for wood products also decreased 1.2% with lower prices for softwood logs and bolts being reported.

On a 12-month basis, the price of raw materials rose 14.5% in August, up from the 13.6% year-over-year increase in July. Mineral fuels were up 30.2% with crude oil prices rising 36.6%. If mineral fuels had been excluded, the RMPI would have fallen 0.9% instead of rising 14.5%.

Prices for non-ferrous metals rose 12.1%, mainly because of higher prices for radio-active concentrates, zinc concentrates and copper concentrates. Higher prices were also observed for animal and animal products and non-metallic mineral products.

Wood products were down 12.2% from a year ago with softwood logs and bolts prices declining 15.2%. Vegetable products decreased 7.8% from August 2004 as prices were down for corn, wheat, barley, soybeans and canola. Prices for ferrous materials also declined 14.5% compared to the previous year.

### Impact of the exchange rate

Between July and August, the value of the Canadian dollar rose 1.5% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 0.7% instead of its actual increase of 0.3%.

On a 12-month basis, the value of the Canadian dollar rose 8.9% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.0% between August 2004 and August 2005, rather than their actual 0.4% decrease.

## Prices for intermediate goods increase

Prices for intermediate goods increased 0.4% from July. Higher prices for petroleum products, primary metal products, meat, fish and dairy products, and chemical products were the major contributors to the increase.

Lower prices for lumber products, fruit, vegetable and feed products, pulp and paper products, motor vehicles as well as electrical and communication products partially offset the monthly increase.

Producers of intermediate goods received 0.4% less for their goods this August than in August 2004. Lower prices were registered for lumber products, primary metals, pulp and paper products, motor vehicles, meat, fish and dairy products, fruit, vegetable and feed products, and electrical and communication products.

These decreases were partly offset by higher prices for petroleum products, chemical products, rubber, leather and plastic fabricated products, non-metallic mineral products, and machinery and equipment.

## Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.3% from July. Higher prices for petroleum, meat, fish and dairy products, chemical products and pulp and paper products were partially offset by lower prices for motor vehicles, lumber products, electrical and communication products, and machinery and equipment.

Compared with August 2004, prices for finished goods were down by 0.4%. Lower prices for motor vehicles, meat, fish and dairy products, electrical and communication products, and lumber products were the major contributors to the annual decline.

Higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, chemical products, rubber, leather and plastic fabricated products, furniture and fixtures, and metal fabricated products partly offset the annual decrease.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its U.S. counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.  
The numeric descriptor is of the order ss-mm-nn-pppp-rr where  
ss indicates the S-level commodity code (from 9 to 28)  
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)  
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details  
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)  
rr indicates a split of a PCGA.

All other miscellaneous manufacturing															
v3822799	33999	2004 2005	111.2 113.1	111.7 113.5	111.7 113.5	112.1 114.3	112.2 114.5	112.2 114.5	112.3 114.1	112.2 114.2	112.2 ..	112.4 ..	112.1 ..	112.7 ..	112.1 ..

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's *The Daily* approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

# Looking for health information online?

## Link up with Statistics Canada's *Guide to Health Statistics!*

**T**he *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let [www.statcan.ca](http://www.statcan.ca)'s *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

**Find the information you need now.** Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

**Save time.** A few clicks and you'll be connected to health information from [www.statcan.ca](http://www.statcan.ca), your source for health facts and analysis.

**Access anywhere, anytime.** You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

**Put the data to work.** Copy text from online right into your documents and databases.

**Expertise you can trust!** You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on [www.statcan.ca](http://www.statcan.ca) to be your bridge to health information.

**It's easy!** Visit our site at [www.statcan.ca](http://www.statcan.ca), click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

**Bookmark it!**

Here are some of the handy links you'll find in the *Guide to Health Statistics*

### Links to insightful analysis and data on:

- ➔ Cancer

### Health Surveys

## Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at [www.statcan.ca](http://www.statcan.ca), and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail [infostats@statcan.ca](mailto:infostats@statcan.ca)
- by mail Statistics Canada  
Finance Division  
R.H. Coats Bldg., 6th Floor  
120 Parkdale Avenue  
Ottawa, ON K1A 0T6
- And, in person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on [www.statcan.ca](http://www.statcan.ca) under About Statistics Canada > Providing services to Canadians.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- <sup>P</sup> preliminary
- <sup>r</sup> revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- <sup>E</sup> use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

<b>Explanation of Methods Used and Additional Sources for Industrial Price Indexes</b>	61

## Highlights

Monthly prices for manufactured goods at the factory gate were up in September, as gasoline and fuel oil prices continued to rise. Raw materials prices were down in September, following three monthly increases.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.4% from August to September. Higher prices for petroleum products, lumber products and chemical products were the contributors to this monthly increase.

### Prices for manufactured goods increase again

The 12-month change in the IPPI was 0.6%, up from August's year-over-year decrease of 0.3% and largely due to the continuing rise of prices for petroleum products.

The Raw Materials Price Index (RMPI) was down 0.3% from August to September, following a 4.5% increase registered the previous month. There were price decreases in wood products, vegetable products and non-ferrous metals.

Compared to September of last year, raw materials cost factories 14.3% more, down slightly from the 12-month change of 14.6% in August.

In September, the IPPI (1997=100) stood at 111.6, up from August's level of 111.2. The RMPI (1997=100) reached 152.7, down from a revised level of 153.2 in August.

### IPPI: Prices for petroleum products continue to rise

On a month-over-month basis, manufacturers' prices were up 0.4% as gasoline and fuel oil prices continued to rise.

Petroleum and coal products prices increased 8.3% compared to August, the eighth increase in the past nine months. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.4%, rather than increasing 0.4%.

Lumber and other wood products were up 2.8% as demand increased for softwood lumber and particleboard following hurricanes Katrina and Rita. Price increases were also registered for chemical products as prices for organic industrial chemical and synthetic resins were up 5.0% and 3.6% respectively.

However, prices for motor vehicles and other transport equipment and electrical and communication products decreased 1.5% and 0.9% respectively, due to the continuing strength of the Canadian dollar.

Primary metal products fell 2.5% as inventories were strong for nickel, copper and aluminum products. Prices for pulp and paper products were down 1.1% due to lower prices for pulp and newsprint paper. Meat, fish and dairy products also registered a decrease of 0.7% from the previous month.

### IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 0.6% in September, following decreases of 0.3% in July and August.

Prices for petroleum and coal products rose 36.1% from September 2004, up from August's increase of 27.9%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 2.4%, rather than increasing 0.6% from a year ago.

Chemical products increased 5.5%, due to higher prices for organic industrial chemicals and synthetic resins. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, tobacco products, non-metallic mineral products, as well as furniture and fixtures.

On the other hand, motor vehicles and other transport equipment prices were down 5.9% from a year ago, the consequence of a stronger Canadian dollar.

Lumber and other wood products declined 14.9% from September 2004 to September 2005, as year-over-year price decreases were recorded for softwood lumber, particleboard and softwood type plywood.

There were also 12-month price declines for primary metals, pulp and paper products, electrical and communication products, meat, fish and dairy products as well as fruit, vegetable and feed products.

### RMPI: Crude oil prices remain unchanged

On a monthly basis, raw materials prices fell 0.3% in September, following three monthly increases. Mineral fuels were unchanged compared to August. Crude oil prices had increased following hurricane Katrina, but as concerns about supply diminished, prices fell to remain unchanged from August.

Prices for wood products decreased 2.2% with lower prices for softwood logs and bolts being reported. Vegetable products were down 2.1% due to strong supply for canola and soybeans and lower demand for coffee. Prices for non-ferrous metals fell 1.7% mainly due to lower prices for copper, nickel and lead concentrates. Ferrous materials decreased 0.7% from the previous month as iron ore prices were down 2.2%.

However, prices for animal and animal products rose 1.3% compared to the previous month as increases were registered for whole fluid unprocessed milk and fish.

On a 12-month basis, the price of raw materials rose 14.3% in September, slightly lower than the 14.6% year-over-year increase observed in August. Mineral fuels were up 28.7% with crude oil prices rising 34.6%. If mineral fuels had been excluded, the RMPI would have decreased 0.2% instead of rising 14.3%.

### Raw materials prices decline

Prices for non-ferrous metals rose 12.5%, mainly because of higher prices for radio-active concentrates, zinc concentrates and copper concentrates. Higher prices were also observed for animal and animal products and non-metallic mineral products.

Wood products were down 14.4% from a year ago with softwood logs and bolts prices declining 17.8%. Vegetable products decreased 6.3% from September 2004 as prices were down for canola, corn, barley, and wheat. Prices for ferrous materials also declined 3.5% compared to the previous year.

### Impact of the exchange rate

Between August and September, the value of the Canadian dollar rose against the US dollar with an increase of 2.2%. As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 1.0% instead of its actual increase of 0.4%.

On a 12-month basis, the value of the Canadian dollar rose 9.4% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 3.0% between September 2004 and September 2005, rather than their actual increase of 0.6%.

### Prices for intermediate goods increase

Prices for intermediate goods increased 0.6% from August. Higher prices for petroleum products, chemical products and lumber products were the major contributors to the increase.

Lower prices for primary metals, pulp and paper products, motor vehicles, meat, fish and dairy products, fruit, vegetable and feed products as well as electrical and communication products partially offset the monthly increase.

Producers of intermediate goods received 0.6% more for their goods in September 2005 than in September 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, non-metallic mineral products, machinery and equipment, and beverages.

These increases were partly offset by lower prices for lumber products, primary metals, pulp and paper products, motor vehicles, fruit, vegetable and feed products, meat, fish and dairy products and electrical and communication products.

### Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.2% from August. Higher prices for petroleum and lumber products were partially offset by lower prices for motor vehicles, electrical and communication products, and non-metallic mineral products.

Compared with September 2004, prices for finished goods were up by 0.6%. Higher prices for petroleum products, tobacco products, chemical products, rubber, leather and plastic fabricated products, fruit, vegetable and feed products, and furniture and fixtures were the major contributors to the annual increase.

Lower prices for motor vehicles, electrical and communication products, and lumber products partly offset the annual increase.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its U.S. counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

1. The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.

The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details

pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)

rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \frac{\sum_i w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

# Looking for health information online?

## Link up with Statistics Canada's *Guide to Health Statistics!*

**T**he *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let [www.statcan.ca](http://www.statcan.ca)'s *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

**Find the information you need now.** Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

**Save time.** A few clicks and you'll be connected to health information from [www.statcan.ca](http://www.statcan.ca), your source for health facts and analysis.

**Access anywhere, anytime.** You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

**Put the data to work.** Copy text from online right into your documents and databases.

### Expertise you can trust!

You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on [www.statcan.ca](http://www.statcan.ca) to be your bridge to health information.

**It's easy!** Visit our site at [www.statcan.ca](http://www.statcan.ca), click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

**Bookmark it!**

Here are some of the handy links you'll find in the *Guide to Health Statistics*

### Links to insightful analysis and data on:

- ➔ Cancer

### Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

### Sample links to related sites:

- ➔ Canadian Cancer Statistics
- ➔ Canadian Institute for Health Information (CIHI)
- ➔ Health Canada
- ➔ Canadian Health Network

**Health information? We've got connections!**

**WHAT IF** there were a place that could save you and your business time and money by offering a consolidated area with the latest in Canadian statistics?

**WHAT IF** there were a place that offered accessible and reliable data on an assortment of current hot topics on Canadian social and economic themes?

**WHAT IF** there were a place where analysis experts that know your markets could provide you with advice and customized data at your fingertips?

**WHAT IF** there were such a place?

**THERE IS SUCH A PLACE.**

## Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at [www.statcan.ca](http://www.statcan.ca), and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail [infostats@statcan.ca](mailto:infostats@statcan.ca)
- by mail Statistics Canada  
Finance Division  
R.H. Coats Bldg., 6th Floor  
120 Parkdale Avenue  
Ottawa, ON K1A 0T6
- And, in person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on [www.statcan.ca](http://www.statcan.ca) under About Statistics Canada > Providing services to Canadians.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- <sup>P</sup> preliminary
- <sup>r</sup> revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- <sup>E</sup> use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

<b>Explanation of Methods Used and Additional Sources for Industrial Price Indexes</b>	<b>61</b>

## Highlights

Monthly prices for manufactured goods at the factory gate were down slightly in October, as gasoline and fuel oil prices declined. Raw materials prices were down again in October, due to lower prices for crude oil.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.1% from September to October. Lower prices for petroleum products were the major contributor to this monthly decrease.

### Prices for manufactured goods decrease

The 12-month change in the IPPI was 1.4%, up from September's increase of 0.9%, largely due to higher prices for petroleum products as well as chemical products compared to one year ago.

The Raw Materials Price Index (RMPI) was down 1.4% from September to October, following a 0.3% decrease the previous month. There were price decreases in mineral fuels and ferrous materials.

Compared to October of last year, raw materials cost factories 8.3% more, down from the 12-month change of 14.4% for September.

The IPPI (1997=100) stood at 111.8 in October, down from September's revised level of 111.9. The RMPI (1997=100) reached 150.7, down from a revised level of 152.8 in September.

### IPPI: Prices for petroleum products decline

Manufacturers' prices were down 0.1% on a month-over-month basis, as gasoline and fuel oil prices dropped.

Petroleum and coal products prices decreased 3.2% compared to September, the first decrease in five months. If petroleum

and coal product prices had been excluded, the IPPI would have increased 0.3% rather than decreasing 0.1%.

Prices for meat, fish and dairy products, pulp and paper products as well as lumber and other wood products also registered small decreases from the previous month.

However, prices for chemical products rose 1.6% due to increases for industrial chemicals. Primary metal products rose 0.8% as inventories declined for copper and demand continued to be strong for zinc, gold and silver products.

Prices for rubber, leather and plastic fabricated products, fruit, vegetable and feed products, metal fabricated products as well as electrical and communication products also increased in October.

Prices for motor vehicles and other transport equipment remained the same, as the value of the Canadian dollar against the US dollar was unchanged from September.

### IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 1.4% in October, following an increase of 0.9% in September.

Prices for petroleum and coal products rose 24.6% from October 2004, down from September's increase of 37.2%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.8% rather than increasing 1.4% from a year ago.

Chemical products increased 5.9%, due to higher prices for organic industrial chemicals and synthetic resins. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, tobacco products, non-metallic mineral products, furniture and fixtures as well as machinery and equipment.

On the other hand, motor vehicles and other transport equipment prices were down 3.7% from a year ago, due to a stronger Canadian dollar.

Prices for primary metal products were down 5.6% from a year ago as decreases were observed for primary steel products (-15.4%), primary nickel products (-15.1%) and primary aluminum products (-4.2%).

Lumber and other wood products declined 5.3% from October 2004 to October 2005, as a year-over-year price decrease of 10.8% was recorded for softwood lumber.

There were also 12-month price declines for pulp and paper products, meat, fish and dairy products, as well as electrical and communication products.

### RMPI: Crude oil prices decrease

On a monthly basis, raw materials prices fell 1.4% in October, following a decrease of 0.3% in September. Mineral fuels were down 4.0% compared to September. Crude oil prices decreased 4.6% as inventories increased and demand was lower.

Ferrous materials decreased 3.6% from the previous month as iron and steel scrap prices were down 5.9%.

However, prices for non-ferrous metals rose 6.5% mainly due to higher prices for zinc concentrates, radio-active concentrates, copper concentrates and lead concentrates. Vegetable products were up 1.8% due to increased prices for wheat, potatoes, sugar and natural rubber. Prices for animal and animal products rose 0.9% compared to the previous month, as increases were registered for whole fluid unprocessed milk, cattle for slaughter and fish. Prices for wood products increased 0.6%, with higher prices for softwood pulpwood being reported.

### Raw materials prices decrease again

On a 12-month basis, the price of raw materials rose 8.3% in October, down from the 14.4% year-over-year increase in September. Mineral fuels were up 14.0% with crude oil prices rising 16.4%. If mineral fuels had been excluded, the RMPI would have increased 2.2% instead of rising 8.3%.

Prices for non-ferrous metals rose 18.6%, mainly because of higher prices for radio-active concentrates, zinc concentrates, copper concentrates and gold. Higher prices were also observed for animal and animal products and non-metallic mineral products.

On the other hand, wood products were down 15.0% from a year ago, with softwood logs and bolts prices declining 18.5%. Prices for ferrous materials also declined 7.1% compared to the previous year.

Prices for vegetable products were almost unchanged from a year ago (-0.1%), as lower prices for grains, oilseeds, potatoes and tobacco were offset by higher prices for natural rubber, coffee and sugar.

### Impact of the exchange rate

Between September and October, the value of the Canadian dollar against the US dollar was unchanged. As a result, the total IPPI excluding the effect of the exchange rate remained essentially unchanged (-0.1%).

On a 12-month basis, the value of the Canadian dollar rose 5.9% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.9% between October 2004 and October 2005, rather than their actual increase of 1.4%.

### Prices for intermediate goods increase

Prices for intermediate goods increased 0.4% from September. Higher prices for chemical products, petroleum products, primary metals and rubber, leather and plastic fabricated products were the major contributors to the increase.

Lower prices for meat, fish and dairy products and pulp and paper products partially offset the monthly increase.

Producers of intermediate goods received 1.7% more for their goods in October than in October 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, non-metallic mineral products and machinery and equipment.

These increases were partly offset by lower prices for primary metals, lumber products, pulp and paper products, motor vehicles, meat, fish and dairy products, and fruit, vegetable and feed products.

### Finished goods prices decline

On a monthly basis, prices for finished goods were down 0.9% from September. Lower prices for petroleum and pulp and paper products were partially offset by higher prices for fruit, vegetable and feed products and chemical products.

Compared with October 2004, prices for finished goods were up by 0.6%. Higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, furniture and fixtures, machinery and equipment, chemical products, rubber, leather and plastic fabricated products, and metal fabricated products were the major contributors to the annual increase.

Lower prices for motor vehicles, electrical and communication products, lumber products, and pulp and paper products partly offset the annual increase.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.  
The numeric descriptor is of the order ss-mm-nn-pppp-rr where  
ss indicates the S-level commodity code (from 9 to 28)  
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)  
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details  
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)  
rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

Statistics Canada's  
official release bulletin,  
every working day  
at 8:30 a.m. (Eastern time)

## This morning, like every morning, you:

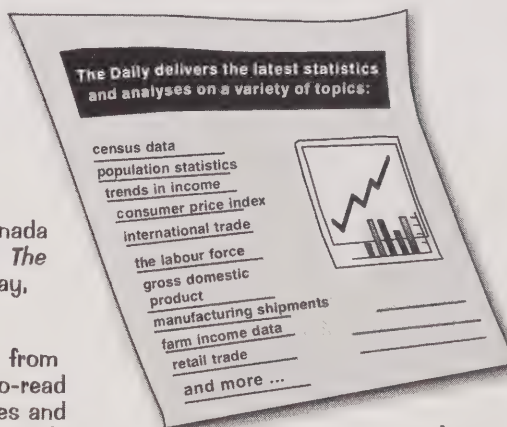

Is that right? You didn't read *The Daily*? Did you know that it's  
the best statistical information source in the country?

Each working day, *The Daily* provides economic and social data that's available free of charge on our Web site. Journalists never miss it. Business leaders and policy makers use it to make sound decisions.

All new data from Statistics Canada must be officially announced in *The Daily*. So if you read it every day, you don't miss a thing!

*The Daily* delivers news directly from Statistics Canada—with easy-to-read news releases, informative tables and simple charts that clearly illustrate the news.

Subscribe to *The Daily*  
on the Internet.  
It's FREE.

Visit [www.statcan.ca](http://www.statcan.ca) to read  
*The Daily* when you need it.  
Or subscribe to the free online  
delivery service and receive  
*The Daily* automatically  
by e-mail.

Add it to your  
day-to-day activities...  
a good way to add  
substance to your *Daily* routine!

# Looking for health information online?

## Link up with Statistics Canada's *Guide to Health Statistics!*

**T**he *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let [www.statcan.ca](http://www.statcan.ca)'s *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

**Find the information you need now.** Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

**Save time.** A few clicks and you'll be connected to health information from [www.statcan.ca](http://www.statcan.ca), your source for health facts and analysis.

**Access anywhere, anytime.** You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

**Put the data to work.** Copy text from online right into your documents and databases.

### Expertise you can trust!

You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on [www.statcan.ca](http://www.statcan.ca) to be your bridge to health information.

**It's easy!** Visit our site at [www.statcan.ca](http://www.statcan.ca), click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

**Bookmark it!**

Here are some of the handy links you'll find in the *Guide to Health Statistics*

### Links to insightful analysis and data on:

- ➔ Cancer

### Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

## Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at [www.statcan.ca](http://www.statcan.ca), and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail [infostats@statcan.ca](mailto:infostats@statcan.ca)
- by mail Statistics Canada  
Finance Division  
R.H. Coats Bldg., 6th Floor  
120 Parkdale Avenue  
Ottawa, ON K1A 0T6
- And, in person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on [www.statcan.ca](http://www.statcan.ca) under About Statistics Canada > Providing services to Canadians.

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- <sup>p</sup> preliminary
- <sup>r</sup> revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- <sup>E</sup> use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

© Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

## Highlights

Prices for manufactured goods at the factory gate were down in November, as gasoline and fuel oil prices declined for a second month. Raw materials prices were down for a third consecutive month in November, due to lower prices for crude oil.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.6% from October to November. Lower prices for petroleum products and lumber products were the major contributors to this monthly decrease.

### Prices for manufactured goods decline

The 12-month change in the IPPI was 2.9%, up from October's year-over-year increase of 1.5% and largely due to higher prices for petroleum products as well as chemical products compared to one year ago.

The Raw Materials Price Index (RMPI) was down 1.7% from October to November, following a 1.5% decline the previous month. There were price decreases in mineral fuels, vegetable products and non-metallic minerals.

Compared to November 2004, raw materials cost factories 12.1% more, up from the 12-month change of 8.2% in October.

The IPPI (1997=100) stood at 111.3 in November, down from October's revised level of 112.0. The RMPI (1997=100) stood at 147.9, down from a revised level of 150.5 in October.

### IPPI: Prices for petroleum and lumber products decline

On a month-over-month basis, manufacturers' prices were down 0.6% as gasoline and fuel oil prices dropped.

Petroleum and coal products prices declined 8.7% compared to October, the largest decrease since May 2003. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.3% rather than decreasing 0.6%.

Lumber and other wood products decreased 2.0%, the result of lower prices for particleboard and softwood type plywood.

Prices for meat, fish and dairy products as well as fruit, vegetable and feed products also registered small declines from the previous month.

However, primary metal products rose 2.0% as inventories continued to decline for copper, aluminum and zinc and demand remained strong for steel products. Prices for chemical products rose 1.4% due to increases for synthetic resins.

Prices for pulp and paper products, rubber, leather and plastic fabricated products, as well as metal fabricated products also increased in November.

### IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.9% in November, following an increase of 1.5% in October.

Prices for petroleum and coal products rose 19.7% from November 2004, down from October's increase of 24.7%. If petroleum and coal product prices had been excluded, the IPPI would have increased 1.2%, rather than climbing 2.9% from a year ago.

Chemical products increased 9.3%, due to higher prices for organic industrial chemicals and synthetic resins. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, machinery and equipment, fruit, vegetable and feed products, electrical and communication products as well as tobacco products.

On the other hand, motor vehicles and other transport equipment prices were down 1.1% from a year ago, as a result of a stronger Canadian dollar.

Prices for primary metal products were down 1.3% from a year ago as decreases were observed for primary steel products and primary nickel products.

Lumber and other wood products declined 0.8% from November 2004 to November 2005, as year-over-year price decreases were recorded for softwood type plywood and softwood lumber.

### RMPI: Crude oil prices decrease again

On a monthly basis, raw materials prices fell 1.7% in November, following a decline of 1.5% in October. Mineral fuels were down 5.0% compared to October. Crude oil prices decreased 5.8% as inventories remained strong and demand was lower.

Vegetable products decreased 0.3% from the previous month as prices were down for natural rubber, raw tobacco and oilseeds. There were also price declines for non-metallic minerals.

## Raw materials prices continue to decline

However, prices for non-ferrous metals rose 5.3%, mainly due to higher prices for zinc concentrates, copper concentrates, radioactive concentrates, and lead concentrates. Prices for wood products increased 1.9% with higher prices for softwood logs and bolts being reported. Prices for animal and animal products rose 1.0% compared to the previous month as increases were registered for cattle for slaughter, and sheep and lambs for slaughter. Ferrous materials also increased from the previous month.

On a 12-month basis, the price of raw materials rose 12.1% in November, up from the 8.2% year-over-year increase in October. Mineral fuels were up 19.1% with crude oil prices rising 23.0%. If mineral fuels had been excluded, the RMPI would have increased 5.2% instead of rising 12.1%.

Prices for non-ferrous metals rose 24.6%, mainly because of higher prices for radioactive concentrates, zinc concentrates, copper concentrates and gold. Prices for animal and animal products were up 3.9% from a year ago due to year-over-year increases for cattle for slaughter, unprocessed whole fluid milk and sheep and lambs for slaughter. Higher prices were also observed for non-metallic mineral products and vegetable products.

On the other hand, wood products were down 9.6% from a year ago with softwood logs and bolts prices declining 12.4%. Prices for ferrous materials also declined 8.4% compared to November 2004.

### Impact of the exchange rate

Between October and November, the value of the Canadian fell 0.3% against the US dollar. As a result, the total IPPI excluding the effect of the exchange would have declined 0.7% instead of its actual decrease of 0.6%.

On a 12-month basis, the value of the Canadian dollar rose 1.3% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 3.2% between November 2004 and November 2005, rather than their actual increase of 2.9%.

## Prices for intermediate goods decrease

Prices for intermediate goods decreased 0.4% from October. Lower prices for petroleum products, lumber products and fruit, vegetable and feed products were the major contributors to the decline.

Higher prices for primary metals, chemical products and pulp and paper products partially offset the monthly decrease.

Producers of intermediate goods received 3.7% more for their goods in November 2005 than in November 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, pulp and paper products, electrical and communication products, machinery and equipment, and non-metallic mineral products.

These increases were partly offset by lower prices for primary metals, motor vehicles, lumber products and meat, fish and dairy products.

### Finished goods prices decline

On a monthly basis, prices for finished goods were down 1.0% from October. Lower prices for petroleum and lumber products were partially offset by higher prices for motor vehicles, rubber, leather and plastic fabricated products as well as non-metallic mineral products.

Compared with November 2004, prices for finished goods were up by 1.4%. Higher prices for petroleum products, machinery and equipment, tobacco products, meat, fish and dairy products, fruit, vegetable and feed products, chemical products, rubber, leather and plastic fabricated products, and furniture and fixtures were the major contributors to the annual increase.

Lower prices for motor vehicles, lumber products, and pulp and paper products partly offset the annual increase.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Mineral fuels	249.0	262.0	-5.0	-8.7	19.1

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative and the All Manufacturing Industries is adjusted to match.

Table 2

## Industrial Product Price Indexes, by Commodity and Commodity Aggregations (1997=100)

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.  
 The numeric descriptor is of the order ss-mm-nn-pppp-rr where  
 ss indicates the S-level commodity code (from 9 to 28)  
 mm indicates the M-level commodity code (from 14 to 43, 45 to 69)  
 nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details  
 pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)  
 rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

# Looking for health information online?

## Link up with Statistics Canada's *Guide to Health Statistics!*

**T**he *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let [www.statcan.ca](http://www.statcan.ca)'s *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

**Find the information you need now.** Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

**Save time.** A few clicks and you'll be connected to health information from [www.statcan.ca](http://www.statcan.ca), your source for health facts and analysis.

**Access anywhere, anytime.** You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

**Put the data to work.** Copy text from online right into your documents and databases.

**Expertise you can trust!** You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on [www.statcan.ca](http://www.statcan.ca) to be your bridge to health information.

**It's easy!** Visit our site at [www.statcan.ca](http://www.statcan.ca), click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

**Bookmark it!**

Here are some of the handy links you'll find in the *Guide to Health Statistics*

## Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- <sup>P</sup> preliminary
- <sup>r</sup> revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- <sup>E</sup> use with caution
- F too unreliable to be published

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

<b>Explanation of Methods Used and Additional Sources for Industrial Price Indexes</b>	<b>61</b>

## Highlights

Monthly prices for manufactured goods at the factory gate were down in December, as prices for petroleum products declined for a third month. Raw materials prices were down for a fourth consecutive month in December, as prices for crude oil continued to fall.

### Prices for manufactured goods decline again

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.3% from November to December. Lower prices for petroleum products, motor vehicles and chemical products were the major contributors to this monthly decrease.

The 12-month change in the IPPI was 2.5%, down from November's year-over-year increase of 2.9% and largely due to higher prices for petroleum products as well as chemical products compared to one year earlier.

The Raw Materials Price Index (RMPI) was down 1.2% from November to December, following a 1.5% decrease the previous month. There were price decreases in mineral fuels as well as ferrous materials.

Compared to December 2004, raw materials cost factories 16.8% more, up from the 12-month change of 12.7% in November.

In December, the IPPI (1997=100) stood at 111.0 down from November's level of 111.3. The RMPI (1997=100) stood at 146.9, down from a revised level of 148.7 in November.

### IPPI: Prices for petroleum products, motor vehicles and chemical products decline

On a month-over-month basis, manufacturers' prices were down 0.3%, mainly due to lower prices for petroleum products, motor vehicles and chemical products.

Petroleum and coal products prices decreased 2.1% compared to November. If petroleum and coal product prices had been excluded, the IPPI would have edged down 0.1% rather than decreasing 0.3%.

Motor vehicles and other transport equipment declined 1.2% as the Canadian dollar remained strong. Prices for chemical products fell 1.3%

from the previous month as lower prices were observed for synthetic resins.

Prices for electrical and communication products, pulp and paper products as well as machinery and equipment also declined from the previous month.

However, primary metal products rose 3.0% as prices for aluminum, nickel and copper products increased due to strong demand and rising production costs.

Prices for fruit, vegetable and feed products, meat, fish and dairy products as well as metal fabricated products also increased in December.

### IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.5% in December, following an increase of 2.9% in November.

Prices for petroleum and coal products rose 25.1% from December 2004, up from November's increase of 18.5%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.6%, rather than increasing 2.5% from the same period a year earlier.

Chemical products increased 7.8%, due to higher prices for industrial type chemicals. Prices were also higher for rubber, leather and plastic fabricated products, primary metals, fruit, vegetable and feed products, tobacco products, non-metallic minerals as well as furniture and fixtures, compared with the same period a year earlier.

On the other hand, motor vehicles and other transport equipment prices and electrical and communication products were down 3.5% and 0.6% respectively from a year ago, mostly as a result of a stronger Canadian dollar.

Lumber and other wood products declined 4.9% from December 2004 to December 2005, as year-over-year price decreases were recorded for softwood lumber, softwood plywood excluding Douglas fir and particleboard. Prices for pulp and paper products were also down from a year ago.

### RMPI: Crude oil prices continue to decrease

On a monthly basis, raw materials prices fell 1.2% in December, following a decrease of 1.5% in November. Mineral fuels were down 4.1% compared to November. Crude oil prices decreased 4.5% as inventories remained high.

Ferrous materials decreased 0.8% from the previous month as prices were down for iron ore and iron and steel scrap.

However, prices for non-ferrous metals rose 5.5% mainly due to higher prices for zinc concentrates, radio-active concentrates, lead concentrates, copper concentrates and gold. Prices for animal and animal products rose 1.4% compared to the previous month, as increases were registered for cattle for slaughter and unprocessed whole milk. Prices for wood products increased 0.8% with higher prices for softwood logs and bolts being reported.

On a 12-month basis, the price of raw materials rose 16.8% in December, up from the 12.7% year-over-year increase in November. Mineral fuels were up 27.2% with crude oil prices rising 32.7%. If mineral fuels had been excluded, the RMPI would have increased 7.3% instead of rising 16.8%.

Prices for non-ferrous metals rose 28.1%, mainly because of higher prices for radio-active concentrates, zinc concentrates, copper concentrates and lead. Prices for animal and animal products were up

3.3% from a year ago, due to year-over-year increases for cattle for slaughter (+17.5%) and unprocessed whole milk (+6.1%). However, compared to December 2004, prices were down for hogs for slaughter (-15.3%) and poultry (-8.8%).

### Raw materials prices continue to decline

There were higher prices for non-metallic mineral products, ferrous materials and vegetable products, while wood products (-6.8%) and softwood logs and bolts prices (-9.1%) were both down compared with the same month a year earlier.

### Impact of the exchange rate

Between November and December, the value of the Canadian dollar against the US dollar was up 1.7%. As a result, the total IPPI excluding the effect of the exchange rate would have risen 0.2% instead of its actual decrease of 0.3%.

On a 12-month basis, the value of the Canadian dollar rose 5.0% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 3.8% between December 2004 and December 2005, rather than their actual increase of 2.5%.

### Prices for intermediate goods decrease

Prices for intermediate goods decreased 0.3% from November. Lower prices for petroleum products, chemical products, motor vehicles, electrical and communication products, and pulp and paper products were the major contributors to the decrease.

Higher prices for primary metals and fruit, vegetable and feed products partially offset the monthly decrease.

Producers of intermediate goods received 3.4% more for their goods in December 2005 than in December 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, primary metals, non-metallic mineral products, fruit, vegetable and feed products, and machinery and equipment.

These increases were partly offset by lower prices for lumber products, motor vehicles, electrical and communication products, and meat, fish and dairy products.

### Finished goods prices decline

On a monthly basis, prices for finished goods were down 0.4% from November. Lower prices for motor vehicles, machinery and equipment, electrical and communication products as well as chemical products were the major contributors to this monthly decline.

These decreases were partially offset by higher prices for petroleum products and meat, fish and dairy products.

Compared with December 2004, prices for finished goods were up by 0.9%. Higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, meat, fish and dairy products, chemical products, rubber, leather and plastic fabricated products, and furniture and fixtures were the major contributors to the annual increase.

Lower prices for motor vehicles, lumber products, and pulp and paper products partly offset the annual increase.

### 2005 in Review

For 2005, manufacturers received an average of 1.5% more for their products than in 2004, much lower than the 3.1% increase in 2004.

The main contributors to this increase were petroleum and coal products (+23.5%), primary metal products (+2.7%), metal fabricated products (+3.8%), chemical products (+6.2%) and rubber, leather and plastic fabricated products (+5.6%).

Motor vehicles and other transport equipment prices were down 4.6% on average in 2005. This decrease was mainly the result of a stronger Canadian dollar.

Lumber and other wood products also declined 8.4% in 2005 compared to 2004 as prices were lower on average for softwood lumber, particleboard and softwood type plywood.

The value of the Canadian dollar in terms of the US dollar strengthened on average in 2005, rising 7.4%. If the impact of the exchange rate had been excluded, the annual IPPI would have risen 3.4% rather than the actual 1.5% increase.

Raw materials prices were up an average of 12.9% in 2005 compared to the 11.8% increase in 2004. Most of the upward pressure came from higher prices for mineral fuels with crude oil prices rising 31.2% on average in 2005. Other major contributors to the annual average increase were non-ferrous metals and non-metallic minerals which rose 14.2% and 9.3% respectively.

### Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

														2005 163.7

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.
  - The numeric descriptor is of the order ss-mm-nn-pppp-rr where
    - ss indicates the S-level commodity code (from 9 to 28)
    - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
    - nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
    - pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
    - rr indicates a split of a PCGA.

Table 3

## Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
<b>ALL MANUFACTURING</b>

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

## Industrial Product Price Indexes, by Stage of Processing (1997=100)

## Explanation of methods used and additional sources for industrial price indexes

### Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in the base period;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

## Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

## Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's *The Daily* approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

### Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

### Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

### Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

### Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period  $o$  and time  $t$  for the defined aggregate;

$w^i$  is the transaction value of the element  $i$  in 1997;

$P_{t/o}^i$  is the price index for element  $i$ , meaning its price change from the base period  $o$  to time  $t$ ;

$\sum_i$  indicates summation over all elements  $i$  in the defined aggregate.

### Reference Document

See reference document in IPPI.

## **Electric Power Selling Price Indexes, Non-residential, (1997=100)**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address [infounit@statcan.ca](mailto:infounit@statcan.ca).

# Looking for health information online?

## Link up with Statistics Canada's *Guide to Health Statistics!*

**T**he *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let [www.statcan.ca](http://www.statcan.ca)'s *Guide to Health Statistics* be your passage to the world of health information. In the *Guide* you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

**Find the information you need now.** Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

**Save time.** A few clicks and you'll be connected to health information from [www.statcan.ca](http://www.statcan.ca), your source for health facts and analysis.

**Access anywhere, anytime.** You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

**Put the data to work.** Copy text from online right into your documents and databases.

**Expertise you can trust!** You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on [www.statcan.ca](http://www.statcan.ca) to be your bridge to health information.

**It's easy!** Visit our site at [www.statcan.ca](http://www.statcan.ca), click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

**Bookmark it!**

Here are some of the handy links you'll find in the *Guide to Health Statistics*

### Links to insightful analysis and data on:

- ➔ Cancer

### Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

### Sample links to related sites:

- ➔ Canadian Cancer Statistics
- ➔ Canadian Institute for Health Information (CIHI)
- ➔ Health Canada
- ➔ Canadian Health Network

**Health information? We've got connections!**

**WHAT IF** there were a place that could save you and your business time and money by offering a consolidated area with the latest in Canadian statistics?

**WHAT IF** there were a place that offered accessible and reliable data on an assortment of current hot topics on Canadian social and economic themes?

**WHAT IF** there were a place where analysis experts that know your markets could provide you with advice and customized data at your fingertips?

**WHAT IF** there were such a place?

**THERE IS SUCH A PLACE.**
